

# VR Controllers mapping for VHT

## HTC Vive controllers

Version 1.0

Virtual  
Home  
Theater

<https://www.virtualhometheater.com>

# Terminology and symbols used:

- #1, #2, ... - your inputs commands order of execution
-  - The direction in which the controller 'laser' must be pointed in order for the commands to be valid
-  - A pink 'laser' beam means that the controller is master
-  - A green 'laser' beam means that the controller is secondary
- DESKTOP - the mirrored desktop screen surface
- ANY - any direction
- Outside (away from the video and GUI screens)
- GUI - the VHT's virtual user interface surface

# Introduction:

To support ambidextrous functionality the VR controllers will not be categorized as left or right but as main and secondary role VR controller.

You can change the role of a VR controller by pressing the <Trigger> button from a VR controller.

The main VR controller will have a pink color 'laser' ray.  
A secondary VR controller will have a green color 'laser' ray.

General use shortcuts.

To turn ON or OFF the mouse pointer device function

# To swap the VR controllers roles
